

Assume you have the following graph.

Update the graph to show what happens when you run the following commands.

Be sure to update the branch pointers appropriately.

```
git merge awesome-branch
```

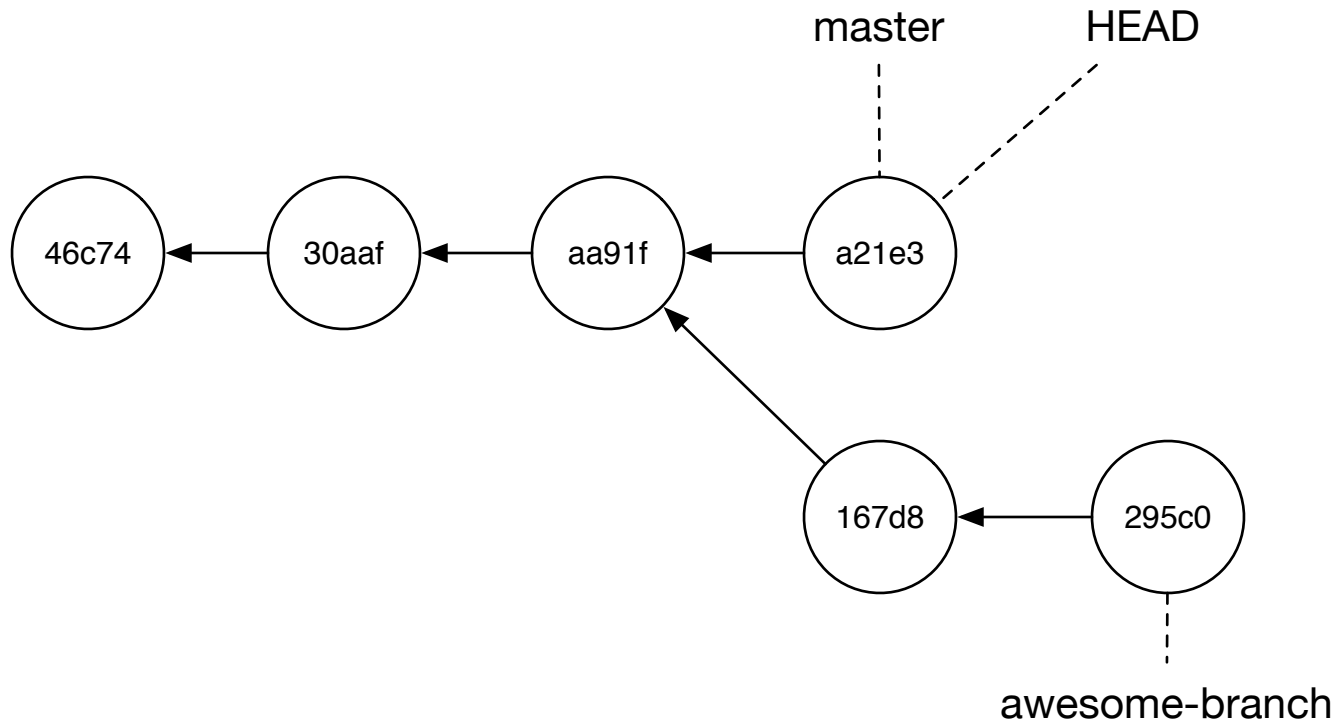

Assume you have the following graph.

Update the graph to show what happens when you run the following commands.

Be sure to update the branch pointers appropriately.

```
git checkout awesome-branch
```

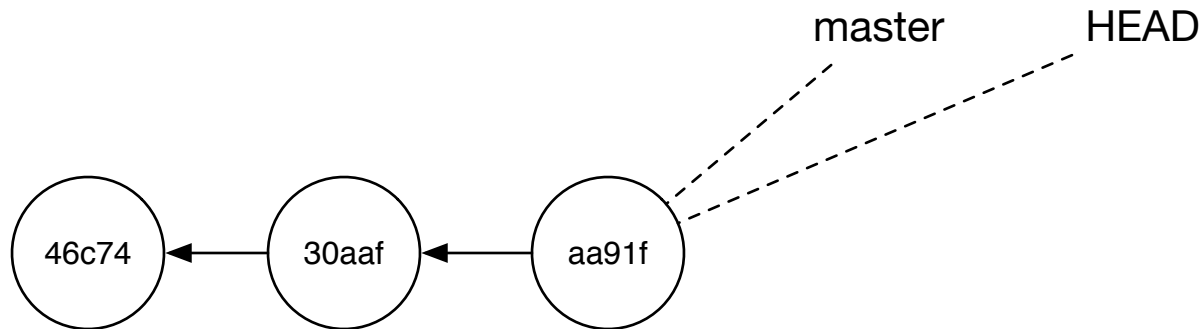

Assume you have the following graph.

Update the graph to show what happens when you run the following commands.

Be sure to update the branch pointers appropriately.

```
git checkout -b awesome-branch  
# pretend you added some files  
git commit -m "Added some files"
```

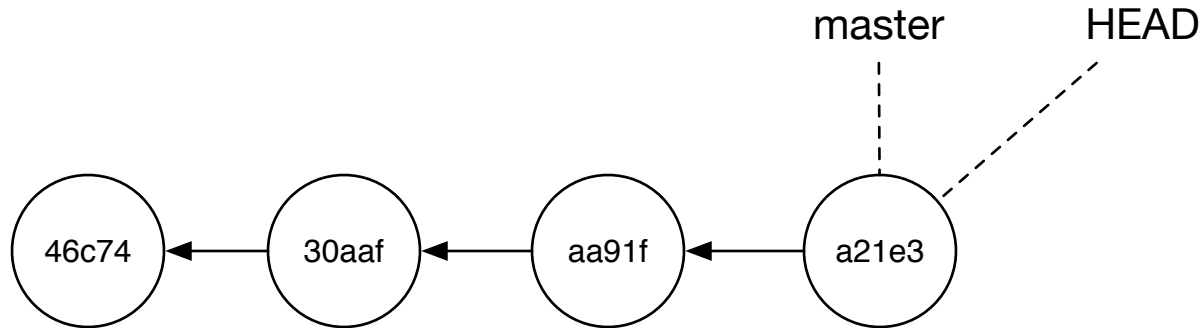

Assume you have the following graph.

Update the graph to show what happens when you run the following commands.

Be sure to update the branch pointers appropriately.

```
git checkout 30aaf
```

Assume you have the following graph.

Update the graph to show what happens when you run the following commands.

Be sure to update the branch pointers appropriately.

```
git reset 30aaf
```
